

# Sustainable Furniture

# OCP Sustainable Purchasing Program – Who We Are & What We Do

- Assist DC in meeting its sustainability goals by furthering green procurement of goods and services through:
  - Developing and maintaining environmental specifications for products and services
  - Offering training and online resources for DC Agencies and procurement professionals to assist in green procurement
  - Vendor education and outreach
  - Consulting services for programs seeking to buy green
  - Tracking green purchasing progress and recommending improvements to the program

### Learning Objectives

- At the completion of this training, you will be:
  - Introduced to the benefits of procuring sustainable furniture products.
  - Introduced to the sustainable specifications for furniture products.
  - Informed of differences in cost and performance of products meeting the specifications compared to conventional products.
  - Aware of options for including more aggressive environmental attributes not included in the guidance specification.

# Scope

This specification addresses furniture used in schools and offices, including:

- 1. Chairs
- 2. Cubicles
- 3. Desks
- 4. Modules
- 5. Shelves
- 6. Sofas
- 7. Storage cabinets
- 8. Tables
- 9. Workstations

# Importance

Furniture is a product category with substantial spending by District purchasers, and potential for clear environmental benefits.

- Many furniture products off-gas chemicals linked to allergies, asthma, reproductive disorders, and cancer
- Sustainable furniture limits emissions of these harmful chemicals, protecting the health of building occupants
- Work performance may improve by up to
   10% by improving indoor air quality
- The District spent \$19.2 million on furniture in FY11 – FY13.
- DC's Green Building Act requires LEED Gold certification for New Construction. Sustainable furniture can help achieve LEED New Construction credits

# Environmental Requirements

Furniture shall be certified to at least **ONE (1)** of the following:

**GREENGUARD** 

SCS Indoor Advantage

Cradle to Cradle (certified at Basic, Bronze, Silver, Gold, or Platinum)

BIFMA Level (certified at Level 1, 2, or 3), with scorecard provided that shows at least one point for Credit 7.6, Low-emitting Furniture

## **Environmental Requirements**

### Rationale

- All options for meeting environmental requirements for furniture support earning points through LEED Gold for New Construction.
- LEED Gold New Construction certification is required through DC's Green Building Act.
- The majority of furniture the District procures is purchased through new construction projects.
- Furniture purchased for other projects that are not deemed new construction should be able to meet these requirements given the ability of the District to comply with the requirements for new construction projects.

### Cost, Performance, and Availability

- Certified furniture is widely available
  - The 7 major furniture companies sell eligible products and 1/3 of BIFMA (furniture association) members sell Level products
  - District vendors carry all recommended certifications
- The District is already purchasing GREENGUARD furniture for new construction projects → current spec increases competition by offering other credible eco-labels
- Sustainable furniture performs just as well as conventional furniture
- Sustainable furniture is cost competitive

### SCS & GREENGUARD Eco-Label Background

**GREENGUARD** 

SCS Indoor Advantage

- Address chemical emissions from furniture which impact indoor air quality during its use.
- Are single attribute labels because they only address one aspect of environmental performance.
- Contain two levels of certification with Gold level being the most stringent. Both certifications for each label meet DC requirements.
- Support earning the LEED v4
   Indoor Environmental
   Quality: Low-Emitting
   Materials credit.

### C2C & BIFMA Level Eco-Label Background

Cradle to Cradle (C2C)

**BIFMA** Level

- Are multi attribute labels
  because they address
  multiple aspects of
  environmental performance.
- A product certified to a multiattribute label may not have a particular attribute.
- Check score cards or product data sheets to verify criteria for specific attributes such as indoor air-quality.

### Cradle to Cradle (C2C) Eco-Label Background

- Evaluates products on material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.
- Products certified at five levels (Basic to Platinum). All recognized by DC's Sustainable Purchasing Program.
- C2C's indoor air quality approach:
  - Basic certification: A complete material inventory is conducted to identify potentially harmful materials.
  - Bronze or Silver certification: a phase out strategy for potentially harmful materials is in place.
  - Gold and Platinum certification: Products may not contain any of the potentially harmful materials.
- Supports earning <u>LEED v4 Building Product Disclosure and</u>
   Optimization Material Ingredients credits. C2C v2 Gold and higher, and C2C v3 Siler support earning more credits than lower ratings.

### BIFMA Level Eco-Label Background

- Products bearing label have been certified by an independent third party to meet the criteria of ANSI/BIFMA e3-2012.
- Standard includes prerequisites and optional credits. Number of optional credits received determines if product is rated Level 1,2, or 3.
- DC's Sustainable Purchasing Program requires BIFMA Level certified furniture products earn at least one point for Credit 7.6, Low-emitting Furniture. This is detailed on the product scorecard submitted by the manufacturer to earn BIFMA certification and is available on websites or by request from the manufacturer. Local vendors also can be of assistance in researching this information as needed.
- BIFMA Level certified products with Level Credit 7.6 support earning <u>LEED v4 Indoor Environmental Quality: Low-Emitting Materials</u> credit.

### office CHAIRS

**Furniture** 

## HON.

# Purpose<sup>™</sup> Series

Fits everyone. Goes everywhere.

- Engineered to support users without complex manual adjustments.
- Innovative YouFit<sup>™</sup> technology delivers a personal fit with three distinct flex zones.
- Designed to work well in a variety of spaces while providing custom comfort to a wide range of users.

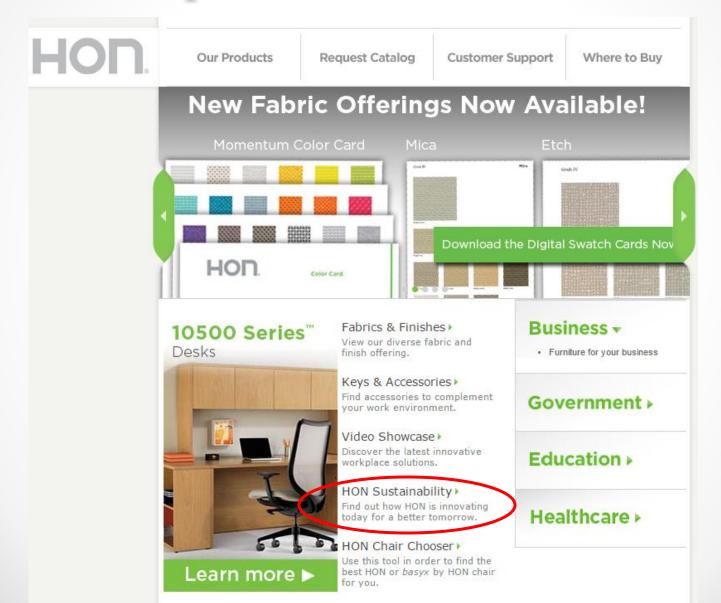

- Supports up to 300 lbs.
- The HON Full Lifetime Warranty.
- Contains 19% total recycled content.
- Scientific Certification Systems (SCS) Certified Indoor Advantage Gold™; Ievel® 2 Certified; Meets or exceeds ANSI/BIFMA and ISTA performance standards.

Meets multiple eco label requirements

## Search Tips: Manufacturer Web Sites

 Furniture companies often have environmental information and data sheets and eco-label certificates in the sustainability sections of their web sites. It often is referred to as product sustainability or product environmental information.

#### **Our Philosophy**

At HON, we take pride in helping our customers create productive environments that leave a lasting impression. But often, the best impressions are the ones never seen. Our greatest impact is our ability to change the business world without changing the environment. By making a commitment to responsibly design and manufacture quality products, we exceed our customers' expectations while being good stewards of the earth. We work diligently to build a culture that encourages excellence, involvement, ongoing education, diversity and responsibility. We continually challenge ourselves to always do more. "HON Thinks Green" is more than a slogan, it's a promise.

#### Lean Leads to Green Eliminating Waste in Every Form

Lean is doing more with less, minimizing waste in all of its forms and ensuring maximum efficiency in

#### **Product Responsibility**

At HON, we take our responsibility to the earth seriously. We take advantage of every step in the product life cycle to minimize our environmental footprint. It starts with designing and manufacturing products that incorporate recycled content whenever possible. We have also significantly reduced the amount of packaging and waste involved in the transportation and installation of our products. It doesn't begin and end with us. We work with our suppliers, dealers and our customers to continually identify areas for environmental improvement. At HON, environmental stewardship is not a new idea, it's at the core of everything we do.

### level® ANSI/BIFMA e3 Furniture Sustainability Standard

Virtually all products have achieved level certification based on the ANSI/BIFMA e3 Sustainable Furniture Standard. level provides measurable, market-based definitions of progressively more sustainable furniture by establishing criteria that address social and environmental aspects throughout the supply chain. Links to level certificates are provided with each product group.

level® Certificates

#### Seating

Wood is a slow renewable resource, so rather than destroying virgin forests we use post-consumer wood waste for many of our seating components, like Ignition<sup>®</sup> and Ceres<sup>®</sup>. Typically, you would find chemical-based foam used for padding, but we find it more comfortable for the user and the environment to use soy-based materials.

# Evaluating the BIFMA/Level Product Certification Scorecard

- BIFMA/Level products require a scorecard that shows at least one point for <u>Level Credit 7.6</u>, <u>Low-emitting Furniture</u>
- All Level-certified products receive a product scorecard during the certification process
  - The scorecard shows how each product earned points to become certified
  - It is important to review the scorecard to verify that a product received credit for low-emitting materials
- Some manufacturers post their scorecards online. Other times, you need to request the scorecard
- The next slide provides an example of how to evaluate the scorecard

### **Environmental Data Sheets**

#### HON

- Some manufacturers publish environmental data sheets that show the environmental characteristics of their products
- Environmental data sheets may be a useful reference in finding furniture that meets the specification, especially if you can't easily locate the BIFMA/Level Certification Scorecard
- Be sure to use a current version of the data sheet, and ask the vendor if you have any questions

#### Commen

- The Hon Company complies with the Federal Trade Commission's Part 260 Guide for the Use of Environmental Marketing Claims. Product recyclability depends on local programs.
- 2. The Hon Company encourages the use of bulk packaging and blanket wrap where appropriate
- Adding 50% of the post-industrial recycled content and 100% of the post-consumer recycled content and then dividing
  the resulting weight by the total weight of the product derives the value factor. Multiplying the value factor by the
  total purchase price of the product determines the product's contribution toward the Project's recycled content
  threshold.
- Information on recycling office furniture components and other assembled products is available from the USEPA Office
  of Waste and Recycling in your region, please visit: <a href="https://www.epa.gov/waste/wvi/regional.htm">https://www.epa.gov/waste/wvi/regional.htm</a>.

#### Section 3. Process Description

- Formed steel components are painted using thermo-set powder coat.
   Components are assembled using mechanical fasteners and/or welding. The seat may be a water-based adhesive to bond the foam to the nation and unfolkerer.
- . A polyethylene bag covers the chair and is placed in a corrugated cardboard carton for shipment to end user

- Information on recycling office furniture components and other assembled products is available from the USEPA Office
  of Waste and Recycling in your region, please visit: <a href="http://www.epa.gov/waste/wyl/regional.htm">http://www.epa.gov/waste/wyl/regional.htm</a>.

Recycled Content Information

# Beyond the Specification

- Specify higher levels of certification for greater environmental protection:
  - Cradle to Cradle: Bronze, Silver, Gold, or Platinum
  - BIFMA Level: Levels 2 or 3
  - GREENGUARD: Gold
  - SCS Indoor Advantage: Gold
- Higher levels of Cradle to Cradle are required to achieve LEED credits in certain categories.
- Products with higher levels of certification are readily available.

Image courtesy of www.dreamstime.com

# Beyond the Specification

- Buy refurbished furniture for greater environmental benefits:
  - Conserve resources: saves raw materials; uses 95% less energy than building new furniture from scratch
  - Reduce pollution: reduces air emissions
  - Reduce solid waste: saves landfill space
- Certified dealers for refurbished products:
  - Gen2 Office Furniture (Cleveland OH) -A re-manufacturer of Steelcase Systems: <a href="http://www.gen2officefurniture.com">http://www.gen2officefurniture.com</a>
  - Open Plan Systems (Richmond VA) A re-manufacturer of Herman Miller Systems: <a href="http://www.Openplansystems.com">http://www.Openplansystems.com</a>
  - RSI Systems Furniture (Chandler AZ) A re-manufacturer of Haworth Systems: <a href="http://www.RSIsystemsfurniture.com">http://www.RSIsystemsfurniture.com</a>

- Take-back services ensure that products that have reached the end of their useful life have been reused or recycled whenever possible
- District employees may donate used products to the Surplus Property Division (SPD)
  - For more information about how to utilize the SPD, call the OCP Customer Contact Center at 202-724-4477.
  - Options include reuse of the product within DC government, sale, recycling, or disposal as a last resort.
